Bekasi Regency, Indonesia

Software Engineer with 3+ years of experience delivering end-to-end software solutions in a global manufacturing environment. Strong background in business analysis, project coordination, full-stack application development, software testing, and technical leadership. Experienced in building systems that support enterprise-scale business processes.

Work Experiences

PT Indonesia Epson Industry - Bekasi Regency, Indonesia

Dec 2022 - Present

System Development Staff

- Led end-to-end software development for internal systems supporting global manufacturing and business operations.
- Gathered and analyzed business requirements from stakeholders and translated them into functional and technical specifications.
- Coordinated project activities including task planning, timeline management, and progress tracking to ensure on-time delivery.
- Designed, developed, and maintained fullstack web and desktop applications, covering frontend, backend, and database layers.
- Implemented RESTful APIs, database integration, and system automation to improve operational efficiency.
- Performed software testing including functional, regression, and user acceptance testing (UAT) to ensure system quality and reliability.
- Defined and prioritized system features based on business impact, user needs, and technical feasibility.
- Provided technical leadership, including code reviews, mentoring junior developers, and enforcing coding standards and best practices.
- Collaborated with cross-functional teams including production, engineering, and management in a global enterprise environment.

PT Xirka Silicon Technology - Bandung, Indonesia

Jan 2020 - Feb 2020

Embedded System Engineer Intern

- Implemented and tested RS-232 and RS-485 communication modules on the Xirka Ardunesia Development Board to optimize serial communication performance.
- Developed embedded system programs using Arduino, C, and C++.
- Assisted in hardware-software integration and system validation for embedded solutions.

Education

Universitas Gadjah Mada 📍 - Special Region of Yogyakarta, Indonesia

Aug 2018 - Oct 2022

Bachelor of Electrical Engineering

- GPA: 3.47 / 4.00 with Undergraduate Thesis "Sistem Regulasi Suhu pada Roaster Kopi Robusta dengan Metode Kendali PID Berbasis Motorized Ball Valve"
- Machine Learning Path Student from Google Bangkit 2022
- Electronic Design Engineer at Gadjah Mada Robotic Team
- Lab Assistant for Digital and Microprocessor Lab. Work
- Lab Assistant for Basic Electronics Lab. Work
- Lab Assistant for Basic Electrical Engineering Lab. Work

Organisational Experience

Gadjah Mada Robotic Team - Universitas Gadjah Mada, Yogyakarta

Oct 2019 - Mar 2022

Electronic Engineer – GMRT Fukuro (KRSBI-B Wheeled RoboSoccer)

- Conducted research and development in electronic system design, including schematic design and PCB development, followed by system testing and ongoing maintenance.
- Led the research, design, and implementation of a Solenoid Kicker system for Wheeled RoboSoccer, covering electrical calculations, driver circuit design, and component selection to achieve reliable and high-power actuation.
- Designed and fabricated PCB layouts, integrated electronic components with embedded systems, and performed debugging, troubleshooting, and performance optimization.
- Collaborated closely with mechanical and software teams to ensure seamless integration between hardware, control systems, and robot mechanics.
- Conducted iterative testing, failure analysis, and system refinement to improve durability, response time, and overall robot performance during competition conditions.

26th Career Days UGM 2019 Student Committee by ECC Upgrad.id - Grha Sabha Pramana, Universitas Gadjah Mada, Yogyakarta

Sep 2019

Information Technology Support

- Set up and configured the internet network, media, and IT equipment to support the event.

Administration Staff

- Prepared, managed, and distributed accurate attendance records for participants, guests, and committee members to support efficient event administration.
- Coordinated with cross-functional committees to ensure smooth event execution, including participant registration, documentation flow, and on-site operational support.
- Maintained administrative accuracy and timeliness to support formal reporting and post-event evaluation.

Technical Skills and Certifications

- **Projects** 📌 (2022): Bangkit Product Based Capstone Project 2022 | C22-PS028 | Mandu.in
- **Certification** 📌 (2022): Machine Learning Path from Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka
- **Research** 📌 (2022): Pengaturan Suhu Penyangrai Kopi Rumahan Bahan Bakar Gas Menggunakan Aktuator Motorized Ball-Valve
- **Projects** 📌 (2022): Sistem Regulasi Suhu pada Roaster Kopi Robusta dengan Metode Kendali PID Berbasis Motorized Ball Valve
- **Certification** 📌 (2022): DeepLearning.AI TensorFlow Developer Specialization
- **Certification** 📌 (2022): Google IT Automation Certificate
- **Certification** 📌 (2022): Google IT Automation with Python Specialization
- **Certification** 📌 (2022): Mathematics for Machine Learning Specialization
- **Certification** 📌 (2022): TensorFlow: Data and Deployment Specialization
- **Hard Skills:** C#, .NET Core, PHP, JavaScript, TypeScript, Python, C++, React, Vue, Node.js, Laravel, MySQL, SQL Server, Git, Linux, Arduino, Raspberry Pi.
